

Knowledge Broadband Services SA in the context of its strategic partnership with **UniSystems SA** for the creation of a **Remote Development Center** is currently working on several exciting European projects and is looking for experienced Software Engineers / Developers to **join the team!**

We are looking for

Senior Software Developers

in **Patras** for full time employment

Our Customers / Users:

- High profile EU Institutions & Organizations: We deliver systems that work and benefit our customers!

You will be working in a **challenging, dynamic and fast-paced environment** and will be requested to **design, implement and test** software solutions for international clients. You will also participate in the **requirements analysis and monitoring** of the project, in order to meet the functional and technical requirements.

More specifically:

- Utilize task tracking systems to monitor the progress of the project
- Provide technical know-how to Business Consultants/Analysts during the requirements gathering
- Design and Implement new systems based on functional and technical requirements
- Maintain and extend existing systems functionality
- Unit & Integration testing of the code
- Create documentation of the deliverables of the project
- Ensure the smooth communication with the clients (via email or personal meetings)

What we ask for:

Essential qualifications

- University/College degree in Computer Science, Information Technology or other relevant discipline
- Experience in:
 - Backend application development using technologies Core Java, JEE or Spring, REST & SOAP WebServices
 - Frontend application development using technologies JSP, JSF
 - Database application development JDBC, SQL, PL/SQL, Database design (Oracle RDBMS)
 - Code Management / Build tools (Maven, SVN, Git)

- Excellent knowledge of the English language (written and verbal)
- Certification in technologies and/or programming languages

Nice to have

- Experience in Writing & Executing Unit & Integration Tests
- Javascript, AJAX, jQuery, AngularJS, React technologies for frontend development
- Experience in Liferay Portal development
- Backend development using ESB technologies (XML, XSLT transformation, Apache Camel)
- Code Integration tools: Jenkins or SonarQube
- Docker containers and container management platforms (Kubernetes, OpenShift)
- Project management using tools JIRA, GitLab, Confluence

We offer:

- Continuous learning/training in new technologies and products
- A great environment to work in and progress professionally
- Competitive salary

To apply for this opportunity, please send an email to jobs@knowledge.gr, subject to "**Senior Software Developers (SSWDC20-02)**", attaching:

1. your resume,
2. cover letter describing your experience with any of the above subjects (academic, work or personal time).

Applicants must plan to stay in Patras for at least 2 years.
