

Knowledge Broadband Services SA in the context of its strategic partnership with **UniSystems SA** for the creation of a **Remote Development Center** is interested in hiring graduates and / or students of IT schools as

QA Automation Engineer

in **Patras** for full time employment

Our Customers / Users:

- High profile EU Institutions & Organizations: We deliver systems that work and benefit our customers!

You will:

Have a keen eye for detail and excellent communication skills and you will ensure that our products, applications and systems work correctly. More specifically:

- Identify the appropriate testing techniques, tools and guidelines to implement the required automated tests (functional or nonfunctional)
- Design and implement the automation scripts for regression and new features
- Execute and maintain automation suite
- Use defect tracking tools to track and follow up on any bugs
- Produce test reports
- Enhance the test automation framework

What we ask for:

Essential qualifications

- University Degree in Computer Science / Information Technology from a Greek or foreign institute
- Practical knowledge of the following:
 - Automation testing tools such as Selenium, TestNG, Cucumber or similar
 - At least one programming language between Java, Groovy, Python, JavaScript
 - Software testing tools (test management & defect tracking tools)
- Excellent use of the Greek and English language (verbal & written)
- Ability to travel abroad on a frequent basis
- Detail-oriented and proactive team player who can work well under pressure, without compromising quality standards and deadlines

Nice to have

- ISTQB foundation level or higher
- Knowledge of SQL, Web Services testing (SoapUI) and performance testing
- Experience working in a cross-platform environment (Windows and Linux) is highly desirable

We offer:

- Continuous learning/training in new technologies and products
- A great environment to work in and progress professionally
- Competitive full-time salary

To apply for this opportunity, please send an email to jobs@knowledge.gr, subject to "**QA Automation Engineer (QASWDC20-02)**", attaching:

1. your resume,
2. cover letter describing your experience with any of the above subjects (academic, work or personal time).

Applicants must plan to stay in Patras for at least 2 years.
