

COURSE OUTLINE

GENERAL

SCHOOL	Polytechnic		
ACADEMIC UNIT	Computer Engineering and Informatics Department		
LEVEL OF STUDIES	Undergraduate		
COURSE CODE	CEID_NE5288	SEMESTER	Fall (elective)
COURSE TITLE	Special Topics in Computational Logic		
INDEPENDENT TEACHING ACTIVITIES <i>if credits are awarded for separate components of the course, e.g. lectures, laboratory exercises, etc. If the credits are awarded for the whole of the course, give the weekly teaching hours and the total credits</i>	WEEKLY TEACHING HOURS	CREDITS	
Lectures and tutorials, Laboratory exercises	3(LT), 2(LE)	5	
<i>Add rows if necessary. The organisation of teaching and the teaching methods used are described in detail at (d).</i>		5	
COURSE TYPE <i>general background, special background, specialised general knowledge, skills development</i>	skills development		
PREREQUISITE COURSES:	None		
LANGUAGE OF INSTRUCTION and EXAMINATIONS:	Greek		
IS THE COURSE OFFERED TO ERASMUS STUDENTS	Yes		
COURSE WEBSITE (URL)	https://eclass.upatras.gr/courses/CEID1131/		

LEARNING OUTCOMES

Learning outcomes

The course learning outcomes, specific knowledge, skills and competences of an appropriate level, which the students will acquire with the successful completion of the course are described.

Consult Appendix A

- Description of the level of learning outcomes for each qualifications cycle, according to the Qualifications Framework of the European Higher Education Area
- Descriptors for Levels 6, 7 & 8 of the European Qualifications Framework for Lifelong Learning and Appendix B
- Guidelines for writing Learning Outcomes

Working knowledge of the syntactic form of propositional formulas, and of the basic properties of their truth values.

Understanding of basic questions and problems, concerning formal proofs in Propositional Logic.

Knowledge of the most important proof systems for Propositional Logic.

Knowledge of computational methods for formal proof discovery.

Theoretical skills relevant to logical equivalence of formulas.

Skills on designing and analyzing computational methods for logical equivalence problems.

General Competences

Taking into consideration the general competences that the degree-holder must acquire (as these appear in the Diploma Supplement and appear below), at which of the following does the course aim?

Search for, analysis and synthesis of data and information, with the use of the necessary technology Adapting to new situations Decision-making Working independently Team work	Project planning and management Respect for difference and multiculturalism Respect for the natural environment Showing social, professional and ethical responsibility and sensitivity to gender issues Criticism and self-criticism
---	---

<i>Working in an international environment</i>	<i>Production of free, creative and inductive thinking</i>
<i>Working in an interdisciplinary environment</i>
<i>Production of new research ideas</i>	<i>Others...</i>

Search for, analysis and synthesis of data and information, with the use of the necessary technology
Production of new research ideas
Criticism and self-criticism
Production of free, creative and inductive thinking

SYLLABUS

<p>Introduction to the basic concepts and techniques of Propositional Logic, emphasizing precise mathematical descriptions of concepts and applications thereof. Examination of the uses of theory to design algorithms for problems of logical equivalence, and to verify their correctness.</p> <p>Coverage: Syntax and semantics of propositional formulas. Notions of implication and logical equivalence, correlative notions of formal proof. Main proof systems for Propositional Logic, properties of correctness and completeness.</p> <p>Computational methods for formal proof discovery, applications to problems of logical implication and logical equivalence.</p>

TEACHING and LEARNING METHODS - EVALUATION

DELIVERY <i>Face-to-face, Distance learning, etc.</i>	Face-to-face												
USE OF INFORMATION AND COMMUNICATIONS TECHNOLOGY <i>Use of ICT in teaching, laboratory education, communication with students</i>	Use of course web page to supplement teaching, and to communicate with students												
TEACHING METHODS <i>The manner and methods of teaching are described in detail.</i> <i>Lectures, seminars, laboratory practice, fieldwork, study and analysis of bibliography, tutorials, placements, clinical practice, art workshop, interactive teaching, educational visits, project, essay writing, artistic creativity, etc.</i> <i>The student's study hours for each learning activity are given as well as the hours of non-directed study according to the principles of the ECTS</i>	<table border="1" style="width: 100%;"> <thead> <tr> <th style="text-align: center;"><i>Activity</i></th> <th style="text-align: center;"><i>Semester workload</i></th> </tr> </thead> <tbody> <tr> <td>Lectures</td> <td style="text-align: center;">26</td> </tr> <tr> <td>Tutorials</td> <td style="text-align: center;">26</td> </tr> <tr> <td>Laboratory</td> <td style="text-align: center;">13</td> </tr> <tr> <td>Non-directed study</td> <td style="text-align: center;">60</td> </tr> <tr> <td>Course total</td> <td style="text-align: center;">125</td> </tr> </tbody> </table>	<i>Activity</i>	<i>Semester workload</i>	Lectures	26	Tutorials	26	Laboratory	13	Non-directed study	60	Course total	125
<i>Activity</i>	<i>Semester workload</i>												
Lectures	26												
Tutorials	26												
Laboratory	13												
Non-directed study	60												
Course total	125												
STUDENT PERFORMANCE EVALUATION <i>Description of the evaluation procedure</i> <i>Language of evaluation, methods of evaluation, summative or conclusive, multiple choice questionnaires, short-answer questions, open-ended questions, problem solving, written work, essay/report, oral examination, public presentation, laboratory work, clinical examination of patient, art interpretation, other</i> <i>Specifically-defined evaluation criteria are given, and if and where they are accessible to students.</i>	<p>Written take-home examinations (in Greek), including brief questions on theory and problems to be solved.</p> <p>Evaluation is based on: extent of theoretical knowledge, precision and correctness of solutions.</p> <p>Answers to exam questions are discussed extensively in the course tutorials.</p>
